Qualifying Questions for a FlexArm Tapper

Are you tapping, drilling (NOT recommended), chasing, reaming, and/or chamfering?

What is the smallest and largest diameter tap you plan to drive?

Any form, NPT, or OD threading?

What type of material are you tapping (aluminum, mild steel, stainless steel)?

How thick is this material?

Do you tap any horizontal oriented taps?

How large are your parts (how much reach do you need from the FlexArm)?

Do you prefer pneumatic (90-120 PSI, 24CFM) or electric/hydraulic (110V, 220V, or 480V)?

How do you plan to mount the FlexArm (do you need a magnet, cart, or table)?
